

ColourRail Railings Price List @ 01/10/08

ColourRail is made from galvanised tubular steel with a powder coat finish in five standard colours to match Colourfence fencing products (Green, Brown, Blue, Cream and Gloss Black) and has a complete range of matching gates. Constructed from 25mm x38mm box section frame and 16mm tubular bars allowing for universal left/right, inward/outward opening.

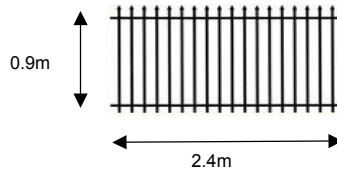

Prices listed are for standard sizes but bespoke openings can be accommodated for a small additional charge. Heights in excess in excess of 1.2m in height, and raked sections can be provided by special commission.

Panels will need to be hung from colour coded steel square posts of an appropriate size if erected independantly, but can also be fixed between pillars or on top of walls without the need for additional posts if circumstances allow. Prices for delivery and installation vary dependant on location configuration but typically these would be in the region of £35 per section for standard installations.
